## **ECCENTRICA BEGINS PRODUCTION OF ITS V12 RESTOMOD: THE "ROSE PHOENIX" HITS THE TRACK FOR TESTING & VALIDATION**

### **San Marino, [ May, 5th 2025] Eccentrica Cars: A New Take on Restomod**

Eccentrica is a restomod brand created to reinterpret iconic Lamborghini-based models through a refined balance of tradition and innovation. Evoking the emotions and nostalgia of '90s performance cars through design and driving dynamics, Eccentrica redefines the very concept of high-performance automobiles.

The brand stands out for its fusion of exclusivity, emotion, and innovation, with a bespoke approach that highlights personalization and craftsmanship.

Eccentrica's vision is built on four fundamental pillars: design, craftsmanship, technology, and customization. Each car is crafted with meticulous attention to detail, offering a fully tailored experience that allows each client to configure the vehicle according to their unique style and preferences.

With an exclusive production model and exceptional care for materials and finishes, Eccentrica is designed for those who don't just want to own a car—but want to live it. Targeted at enthusiasts and collectors, it offers a pure, immersive driving experience that retains the charm of the original car while incorporating modern precision and reliability.

### **Emanuel Colombini: The Vision Behind Eccentrica**

Eccentrica was founded by Emanuel Colombini, entrepreneur and President of Colombini Group.

Born from his lifelong passion for Lamborghini, the project was sparked by his desire to reinterpret a true icon—the Diablo—fusing its original soul with cutting-edge technical solutions.

His bond with Lamborghini began in childhood, when he was struck by the image of a red Diablo on the cover of a car magazine—an icon of speed and engineering. Years later, this fascination became something more concrete. As a collector and racing driver, Colombini explored the brand's legacy and became convinced that the Diablo could be reimaged—enhanced without betraying its essence.

Drawing on his leadership experience in the furniture industry, Colombini applied the same entrepreneurial mindset to the automotive world. Eccentrica was born from the idea of preserving the Diablo's DNA while improving usability and performance through the harmony of design, engineering, and innovation. The first prototype was unveiled in July 2023, marking the beginning of a project that—with first deliveries expected in 2025—aims to redefine the concept of restomod for a new generation of enthusiasts.

### **Eccentrica V12: The Ultimate Restomod**

The Eccentrica V12 embodies the perfect balance between legacy and innovation. Based on the first-generation Lamborghini Diablo, it retains the legendary naturally aspirated 5.7L V12 engine, now optimized to deliver 550 horsepower. This was achieved through technical upgrades including new camshafts, electronic throttle bodies, and selectable engine mapping controlled from the central tunnel.

To enhance the driving experience, Eccentrica features a six-speed manual gearbox with shorter ratios for improved responsiveness, coupled with an innovative electric reverse gear. The chassis, reinforced with composite materials, has been redesigned for greater rigidity and sharper handling. The use of carbon fiber has also reduced overall weight by 40 kg, improving agility and dynamics. The suspension setup includes double wishbone architecture and semi-active Tractive dampers adjustable across five levels to suit different driving conditions. The braking system, developed in partnership with Brembo, features 380 mm front discs and six-piston calipers, delivering uncompromising stopping power.

Pirelli P Zero tires ensure superior grip and control, while custom-forged 19-inch aluminum wheels offer enhanced performance, reduced unsprung weight, and refined driving feedback.

Inside, Eccentrica blends artisanal luxury and modern tech. The infotainment system, inspired by '90s aesthetics, retains the spirit of the original while offering advanced functionality. Integrated controls on the steering wheel, a fully digital instrument cluster, and a tailor-made Marantz sound system ensure an immersive, high-fidelity driving environment.

Only 19 units will be built, each fully customizable to reflect the personality of its owner.

## **Eccentrica Presents the Rose Phoenix**

The unveiling of Rose Phoenix—the second customer car and the first in the official production run of the 19 Eccentrica V12 units—marks another key milestone in the company's development.

This bespoke configuration features a triple-layer Rose Gold livery, a refined and luminous tone that highlights the car's sculptural lines with iridescent reflections under light. Semi-matte black details, applied to select body elements, create a bold yet elegant contrast, underlining the car's aggressive character.

Inside, the cabin balances luxury and sportiness, with Maxpell nubuck leather and Coconut-colored Alcantara wrapping the seats, dashboard, and panels—offering both velvety touch and exceptional comfort. Rose Gold accents on the dashboard, central tunnel, and door panels mirror the exterior, creating a sophisticated interplay of tones between inside and out. Every detail has been conceived to deliver an exclusive sensory experience, where fine materials and design sophistication come together in perfect harmony.

## **Testing & Validation: The Heart of Performance**

"Refining a car like Eccentrica goes beyond validating technical data: it's about creating an authentic connection between driver and machine. Every kilometer in testing helps us shape not just performance, but character—so the car conveys real emotion and stays true to its legacy." —

Maurizio Reggiani, Technical Advisor, Eccentrica.

## **The Art of Redefining Driving Emotion**

“With Eccentrica, we haven’t just updated an iconic vehicle—we’ve rewritten how it communicates with the road. By reworking the chassis dynamics, steering response, and the fluidity of the V12, we’ve turned every drive into a pure, visceral, and rewarding experience.” — Emanuel Colombini, Founder of Eccentrica
